

## COVID-19: Level 2 medical masks for all employees

### **Audience: All Operations employees**

---

- We have an important update today about our masks.
- Canada Post is now moving to provide all employees with disposable, Level 2 medical masks.
- These Level 2 medical masks will offer greater protection for all of us, while continuing to meet or exceed the standards set by the Public Health Agency of Canada, or PHAC.
- We started deploying Level 2 medical masks in early January, to people in facilities with higher numbers of COVID-19 cases.
- We're now ramping up our distribution efforts, and expect to have Level 2 masks for all employees by the end of February.
- So far, the masks have been well-received by employees. They're easy to use and provide additional protection.
- When the new masks arrive, we'll let you know and provide instructions on how to use them.
- Until then, continue to use your Canada Post-supplied masks. That means either your three-ply reusable cloth masks, or the disposable medical masks.
- As you know, we must continue to meet PHAC guidelines. So please remember whichever mask you wear, it must be provided by Canada Post.
- If you have concerns about wearing the masks provided by Canada Post, you can come talk to me about it.
- Thanks everyone.
